Dhaka, Bangladesh

Professional Summary

I am an aspiring Software Engineer passionate about building full-stack web applications. My goal is to contribute to impactful projects, continuously improve my skills, and solve real-world problems through technology. I am driven by challenges and eager to grow in a collaborative, innovative environment.

Technical Skills

Expertise:
JavaScript (ES6+), React.js, Tailwind CSS, Firebase, REST API Integration, React Router, Context API
Comfortable:
Node.js, Express.js, MongoDB, DaisyUI, HTML5, CSS3, Git & GitHub, Netlify, Vercel
Familiar / Currently Learning:
TypeScript, Next.js, Redux, Mongoose, Python, OOP, Data Structures & Algorithms, SQL

Projects

MealBridge – Full Stack Web App
Overview:
MealBridge connects food donors with people in need, reducing food waste by enabling real-time donation posting and claiming. It fosters a caring community through a secure, role-based system.
Major Features:
• Donors can add, edit, and delete food items
• Receivers can claim available food in real time
• Role-based dashboards with secure Firebase + JWT authentication
• Real-time updates and tracking of donations

PlantBook – Full Stack Web App
Overview:
PlantBook is a gardening community platform where users can share plant care tips, hire local gardeners, and join gardening events. It's designed to connect, educate, and empower garden lovers.
Major Features:
• Share, browse, and search gardening tips
• Full CRUD operations for plant care tips (create, read, update, delete)
• Personalized profiles with Firebase authentication
